March 2007

Yamaha Racing Team Powers Into 2007.

The Yamaha Racing Team will be able to defend its 2006 Australian Superbike and Supersport titles with the reassurance that their machines are powered by Yuasa Powersports batteries.

As part of a new sponsorship agreement for 2007 the Yamaha Racing Team will fit genuine Yuasa YTZ batteries in its R1 Superbike and R6 Supersport championship race bikes.

Incorporating cutting edge technology and industry leading designs, the Yuasa YTZ battery provides exceptional power-to-ratio over other batteries. This enables the team to fit smaller, lighter, more volume efficient batteries into its machines to help achieve a competitive edge.

Famous for being the original equipment (OE) battery of choice for the majority of the world's leading vehicle manufacturers, Yuasa has over 100 years' experience dedicated to the manufacture and supply of superior quality powersports batteries.

Suitable for use in Motorcycles, Scooters, ATV's, Utility Vehicles and Personal Watercraft, only genuine Yuasa Powersports batteries utilise state-of-the art manufacturing processes approved by leading vehicle manufacturers.

Yuasa Powersports batteries are exclusively distributed in Australia by CenturyYuasa. Century has been manufacturing and supplying superior quality batteries for over 75 years and is the most well-recognised automotive battery brand in Australia.

To find out more information about the extensive range of Yuasa Powersports batteries, please call 1300 362 287 or visit the Yuasa website at www.yuasa.com.au
